In Stockholm, the **Associazione Caravaggio** charges a very low membership fee and offers aperitivos, film screenings, talks and even cookery classes and wine tastings through the year. And the **Istituto Italiano di Cultura** is open to the public offering events and exhibitions with an Italian theme, as well as its own Italian-language library. Yet another Stockholm cultural organization is **Il Ponte**, which puts on plenty of events from opera to aperitivo as well as workshops and a preschool for children.

Several people got in touch to let us know about Italian-language readings for children at libraries across the country, so it's well worth finding out which events are on at your local library, as well as checking out the selection of Italian-language books.

For the politically minded, **Fratelli Rosselli** is an organization with no party affiliation which hosts debates.

And you can watch Italian theatre put on by **TeaterPi** or **Varför inte**, two groups which have each been running for over a decade.

For those new in Stockholm or visiting from elsewhere in Sweden, you can take a **guided tour** of the city in Italian. And for football fans, Italian expat team **AC Azzurri** plays in Stockholm.

Although these organizations are primarily based in Stockholm, it's well worth checking out **FAIS**, a site that brings together the various Italian cultural organizations in Sweden and advertises the events they put on.
